

NOT FOR RADIOACTIVE MATERIALS
ANIMAL TISSUE DISPOSAL SERVICE

NAME (PRINT)	# OF BOXES	DATE	MAXIMUM BOX WEIGHT
FACULTY MEMBER OR SUPERVISOR	DEPARTMENT / Building		TELEPHONE NUMBER
IDENTITY OF PATHOGENS AND TOXIC CHEMICALS, IF PRESENT			QUANTITY OF CHEMICAL(S)
ANY SPECIAL PRECAUTIONS?			

1. This service is for the disposal of experimental animal tissue. You may dispose of animal bedding by this method if it contains pathogenic agents. No other materials are permitted.
2. If pathogens are present in the waste, identify above and affix a biohazard sticker to each box.
3. Boxes will be incinerated at 1600 to 1800 °F. This incinerator is inappropriate for the disposal of chemicals. Chemicals present in the waste must be in quantities small enough to be inconsequential. If present, please identify any toxic chemicals above.
4. Place tissues in a plastic bag and box. If needed to keep bag from moving, surround with packing materials approved by Environment, Health & Safety.
5. Seal boxes with tape and freeze completely to prevent leakage.
6. Boxes must not exceed 40 lbs (or 20 kg). On each box, write the approximate box weight and write the weight of the heaviest box above.
7. One form is sufficient for more than one box provided the information on the form is the same for all boxes. Attach this form to one box.
8. Pickup time is 9:00 AM on Wednesday and Friday. Place boxes on your loading dock between 8:30 and 9:00 A.M.
9. Call Safety at 5-5000 or send request via web (<http://www2.fpm.wisc.edu/safety/Radiation/pkup.html>) to schedule a waste pickup.

Environment, Health & Safety Department 265-5000
